Evaluation Summary
5th Transnational Meeting
22.-26.02.2016; A Coruna, Spain

The 5th meeting has been evaluated directly after the meeting with short statements by the partners, which were recorded as videos. In addition the partners were asked to answer some questions in written form sometime after the meeting after they had time to reflect about the meeting and think about the different aspects and methods used during the meeting. This document is a summary of the comments by the partners.

1. What were your expectations for the project meeting in A Coruna?

The partners expected from the 5th transnational meeting to define the contents for the MOOC and to finish the work on the BrickMe platform especially focusing on clarifications on the translations into the different languages. In addition, they were hoping to get a general overview of all services created by partners as well to get some information about the current stage of service development. Furthermore, they wanted to discuss the list of outcomes of the project and the progress so far.

2. Did the meeting meet your expectations?

The majority of partners answered that their expectations were fulfilled. A minority of partners wrote, that although most of their questions had been answered, for some others there had been disagreement among the partnership.

3. Were all important matters regarding the project discussed to your satisfaction?

For most of the partners everything had been discussed and cleared up during this meeting. Although all matters were discussed, not for everything a consensus could be found among the partnership, but at the end the majority of partners agreed on certain solutions.

4. Has anything been missing what you would have liked to discuss?

None of the partners missed anything or felt that important issues had not been discussed during the meeting. Although not for all matters a consensus had been found, it could be reached after the meeting. One partner mentioned in the evaluation that although everything has been discussed there might be questions arising afterwards.

5. Are you aware of the final steps to be taken until the end of the project?

All partners are confident about the final steps within the project: completion of OER's; active use of the BrickMe platform; preparation of the MOOC; all services should be in place; completion of reports and documentation.
